

BIG DREAMS

Artistic Engineering Models LLC, a name that speaks on its own in the field of model making is registered in Industrial Area 10, Sharjah, United Arab Emirates and is engaged in manufacturing of architectural and industrial scale models. Artistic has worked closely with many of the most reputed designers, architects, developers and city planners in the MENA region.

With our team of professional artists, craftsmen, designers and technicians we fabricate world class high quality scale models, on time in various types such as architectural, interior, masterplans, industrial, corporate gifts and museum models, all of which may be made as interactive models incorporating the use of touch screen devices.

OUR VISION

To become the world's favorite model maker by spreading our excellence to more people and places.

WHY ARTISTIC ?

Our passionate team can fabricate and deliver complex designed, high quality scale models on time taking into consideration our client's budget. Apart from hand crafting, we administer up to date cutting edge technologies like 3D printing, laser cutting and CNC routing to produce components that are accurate up to 0.01 of a millimetre. In addition to the latest cutting and forming machineries our studio houses the latest computers with up to date software, full-fledged carpentry division and a dedicated paint shop to apply all finishes.

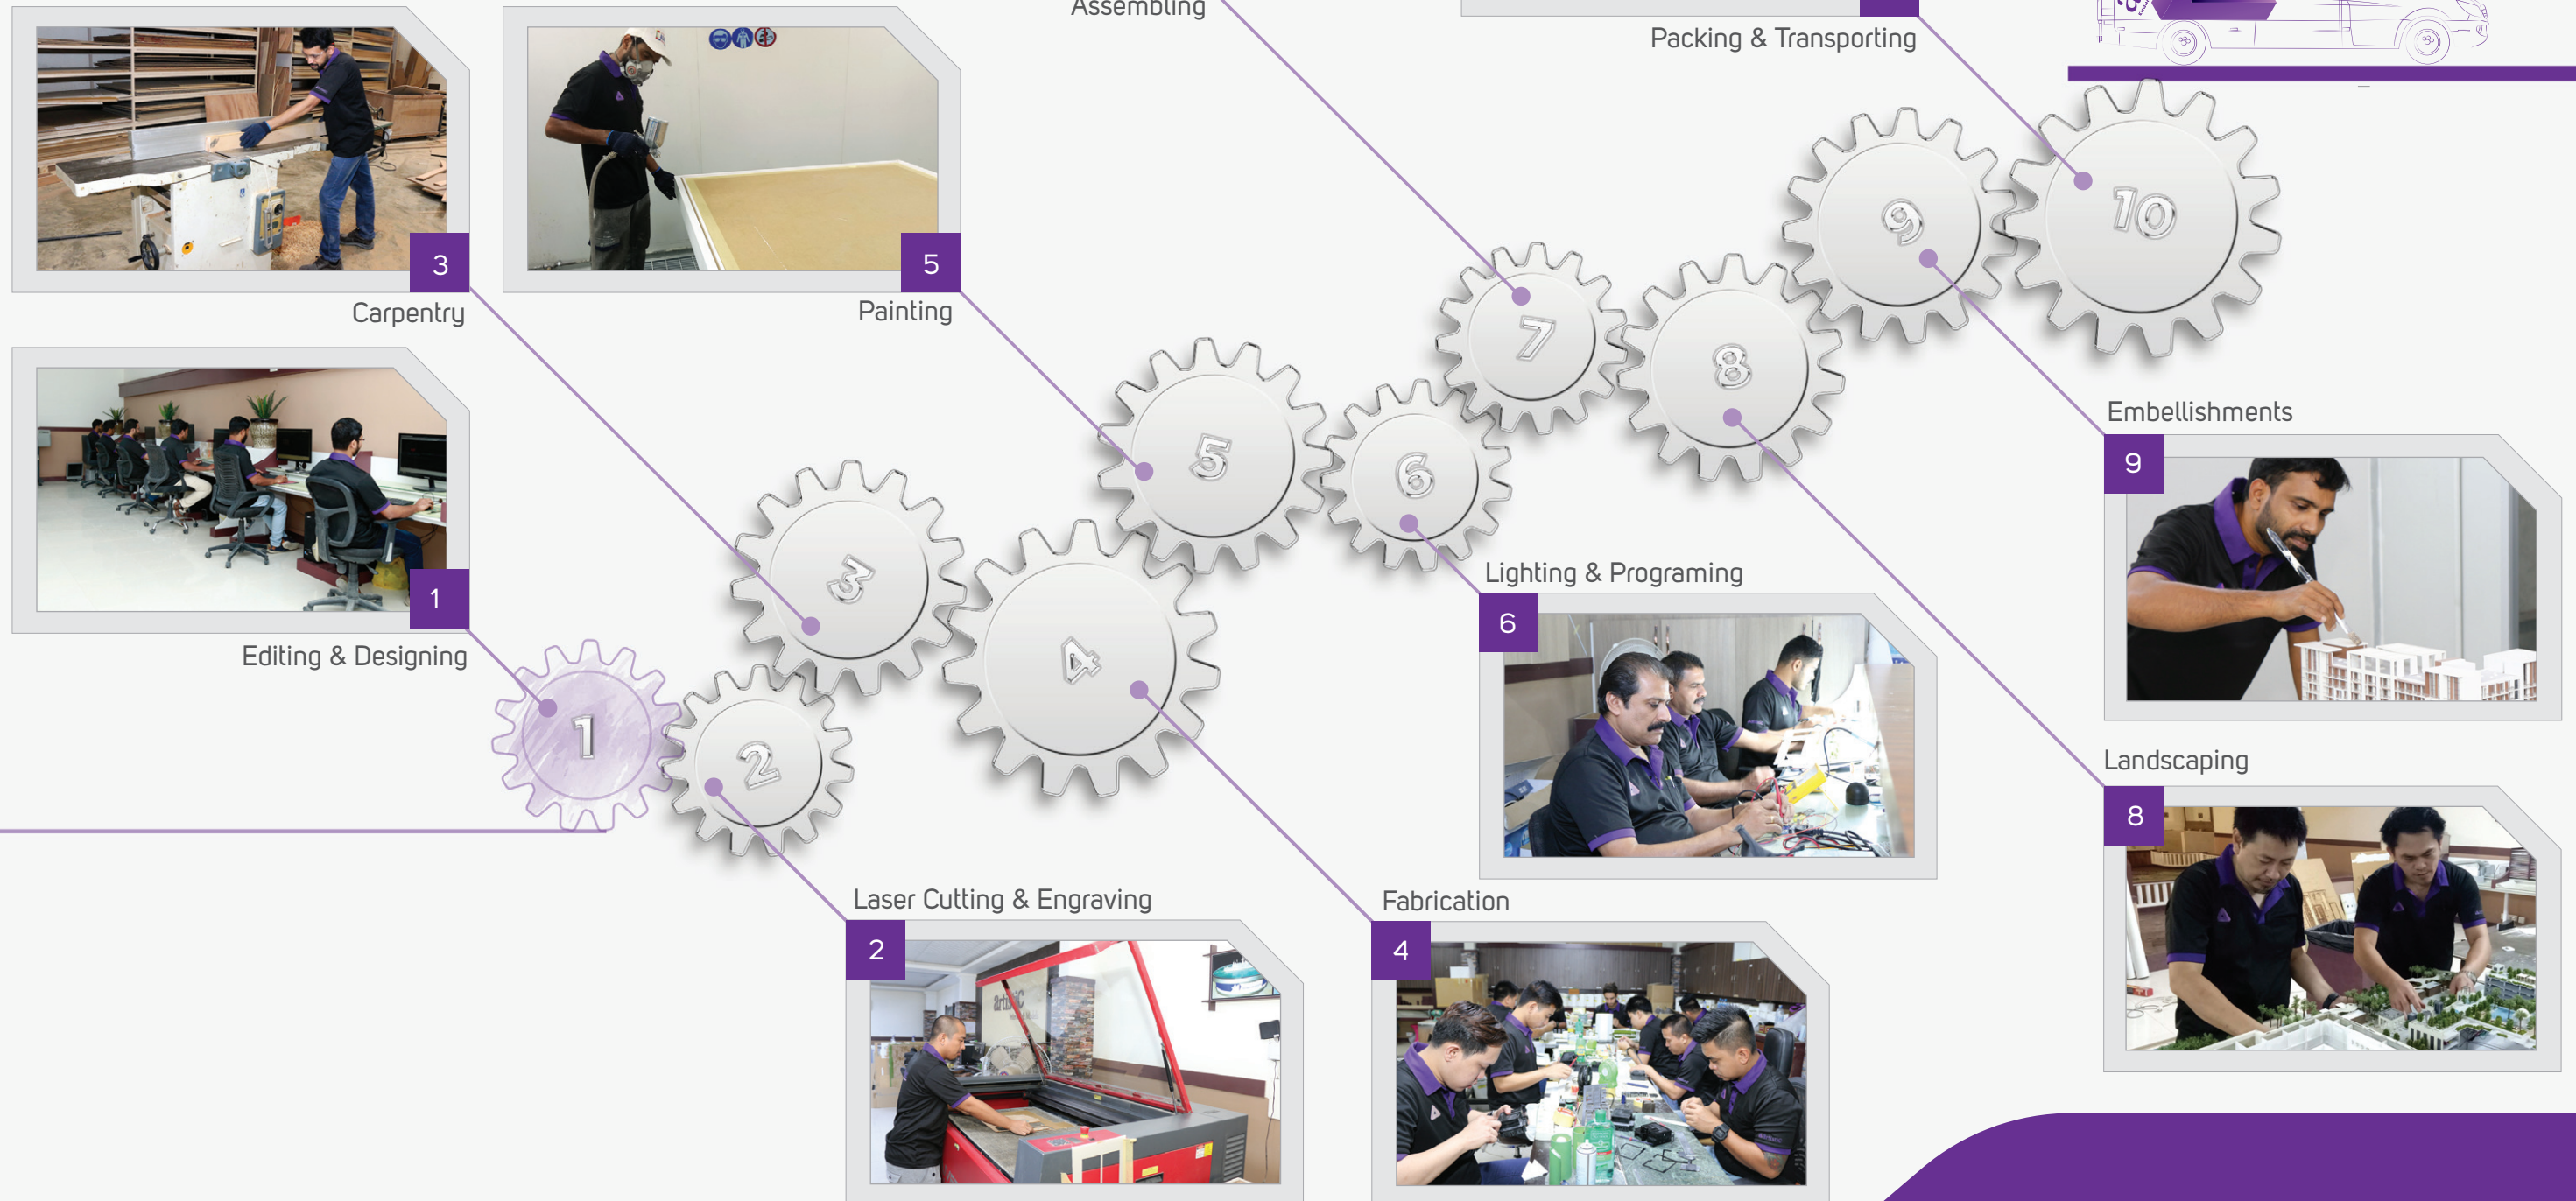

We specialize in technology oriented value added services like mechanization, mobile integration, laser lighting, projection mapping, augmented reality and virtual reality for our models.

WE CARE FOR OUR CLIENT AND WE ARE PROUD OF THE QUALITY IN WHICH WE DELIVER EVERYTIME

Studio

Our studio is well planned and equipped with the latest machineries and tools. A comprehensive working environment which enhances our skilled and dedicated professionals to carve clients' and designers' dreams into reality.

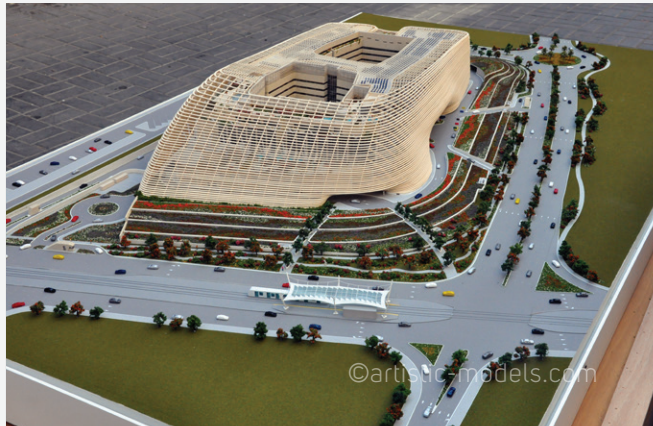

History

Artistic Engineering Models was founded in 1998 by **Zakkir Hussain** a highly skilled model making craftsman. It was his endeavor to personally create custom scale models for the booming real estate development market of the UAE in particular Dubai. At this early stage Zakkir recognized the importance of understanding his clients' design and portraying the design intent through the scale model. All models were purely handcrafted by a small team and quality was and is still remains our priority.

Keeping in mind our heritage Artistic Engineering Models has moved forward in great leaps and bounds for the past 20 years. We have stuck to our core values of creating scale models that are of the highest quality standard, while learning to combine a fine balance of handcraftsmanship with specialized digital based machineries and computerized technologies. Starting with a small team of model makers with a passion and dedication for excellence, we have multiplied into a model making force of 100 plus mixed skilled craftsman capable of delivering quality scale models in short periods of time at very competitive prices.

Products and Services

-  Architectural Scale Models
-  Interior Scale Models
-  Master Plan Scale Models
-  Museum Scale Models
-  Transport (Land / Air / Water) & Military Scale Models
-  Industrial Scale Models
-  Corporate Gift Models
-  Scale Up Models
-  Digital Services
-  Ancillary Services

MODEL SHIFTING (Local or International Event Setup)

Our careful shifting and installation techniques guarantee that the model will arrive at its next destination on time and intact. We offer this service for any existing model regardless of where it was made and regardless of its complexity. We are highly specialized in shifting and installing models that house the latest electrical and mechanical technologies.

MODEL STORAGE

We offer model storage for short term and long term stays. Our facilities are temperature controlled and we make sure to keep your model in perfect shape ready for the next grand event.

MODEL CLEANING AND REFURBISHING

Model cleaning or refurbishing services include cleaning and repairing models on a regular basis which helps in slowing the ageing process. Our team uses modern maintenance techniques to restore existing models. These services are important in case of models that are exhibited for marketing purposes.

MODEL PACKAGING

Delicate models that need transportation have to be packed well in order to avoid damage. Special anti-vibration tailor made flight cases are used to prevent damages that may arise from shifting and transportation. Our flight cases are of high international standard and accommodate the model when being shipped around the globe.

DISPLAY TABLES

Display tables are used to showcase models at exhibitions or wherever the model will be displayed. We offer a wide range of display tables and also design display table according to our clients' needs.

ACRYLIC COVER AND FENCING

Acrylic and glass covers are used to protect the model from dust and damages in turn prolonging the models life. Fencing allows for adults to view the model while preventing children from touching. We can form our acrylic covers in many shapes to suit display table design.

LASER AND CNC CUTTING

With our latest state of the art laser and CNC cutting machines we offer cutting of materials at competitive prices.
